HARDWARE REQUIREMENTS

FULL HD LED MONITOR > 46"

WINDOWS IOT COMPATIBLE
SINGLE-BOARD DEVICES
(*raspberrypi3ModelB,Dragonboard*)

HDMI CABLE

RTC MODULE chip-S3231
REALTIME CLOCK MODULE
necessary in case of no internet

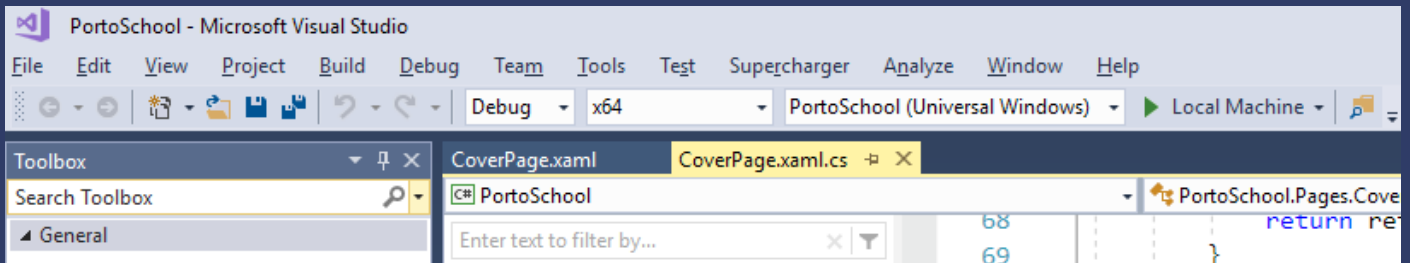

SOFTWARE REQUIREMENTS

- Windows 10 x64 or Higher
- Visual Studio 2017 or Higher. (You must install Universal Windows Platform Modules.)
- A Local Copy of PortoSchool Opensource Github Project

INSTALLATION AND RUNNING

You can run or deploy portoschool on any windows dependent operating system. Thus, it can run on windows 10 or higher, Windows IOT (which is specified for single-board mini computers).

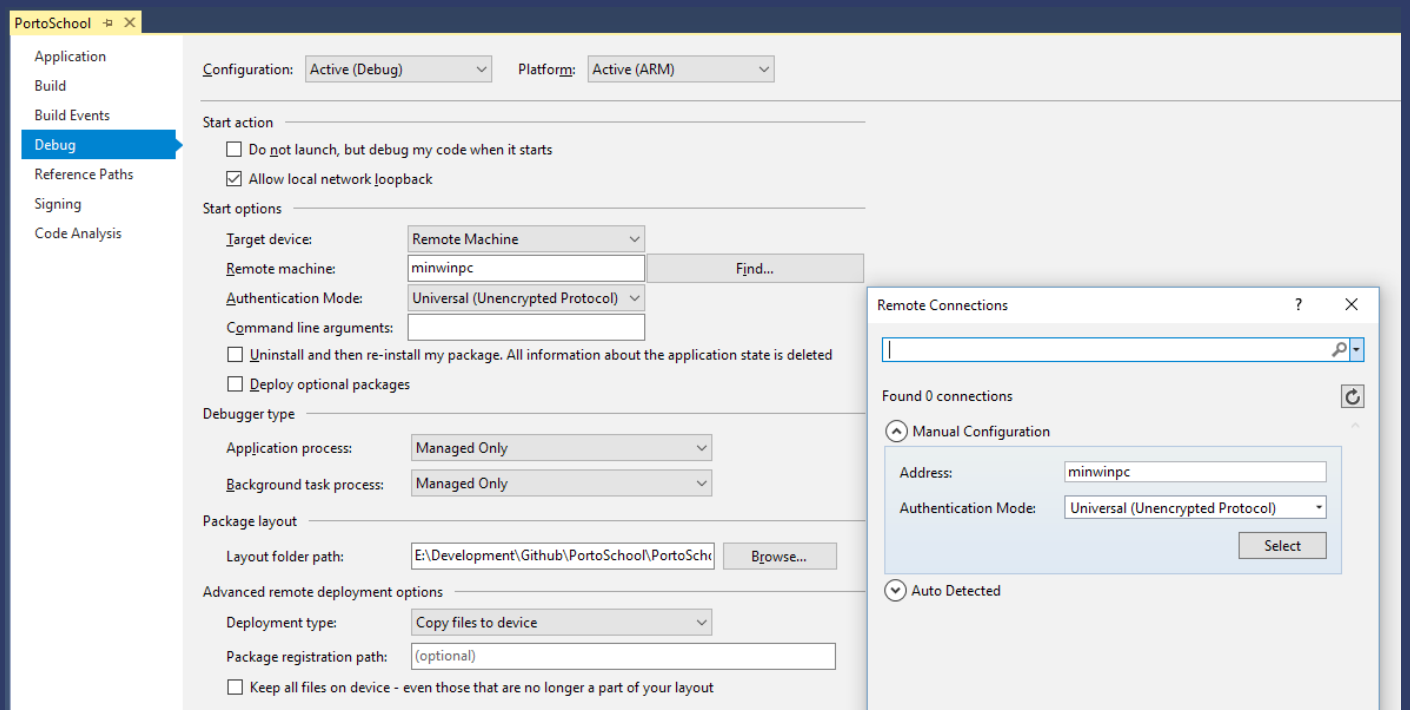

To run on windows 10 for development and debugging purposes you need to select Debug | x64 | Portoschool | Local Machine on top of Visual Studio 2017 and press “Run”.

To deploy and run on Windows IOT that you installed on any compatible Single-Board Mini Computer like Raspberry PI3, you need to select the following combination : Debug | ARM | PortoSchool | Remote Machine.

Before press the run button, you have to connect your mini PC on network via Ethernet cable or WI-FI. Your PC and Single-Board Mini-PC should be on same subnet mask. Even you should check Mini-PC is on the list of Windows IOT Core Dashboard.

CONFIGURATION - LEFT PANEL

DATABASE DICTRETORY

\\pc1\C\$\Users\pc1\AppData\Local\Packages\06fb6d66-51b3-4beb-893c-7e

Educational Foundation Name Line 1,2 : Label on top of Logo Picture at Presentation Cover Page.

Host Adress : Read-only Section. Refers the Mini-PC's IP. So you can connect it via Remote-PC using this address.

This Device : Default is minwinpc for Windows IOT | Raspberry PI3. Its also modifiable via Windows 10 IOT Core Dashboard tool.

Cover Slider Duration : Presentation Cover Slider Page delay duration 5 to 120 seconds.

Slider Duration : Bulletins / Announcements / Picture Slides delay duration 5 to 120 seconds.

Database Directory : Refers the Directory that you have to copy bulletins / announcement / picture files (currently pdf, jpg only available).

CONFIGURATION - LEFT PANEL

SETTINGS

SHUTDOWN

RTC MODULE (Modify Date Time Picker and Press Following Button) :

SET RTC MODULE TIME

USER INTERFACE LANGUAGE :

en-US

CHANGE LANGUAGE

-4beb-893c-7e099fe465f1_3asabdzmrwg6\LocalState\PortoSchool

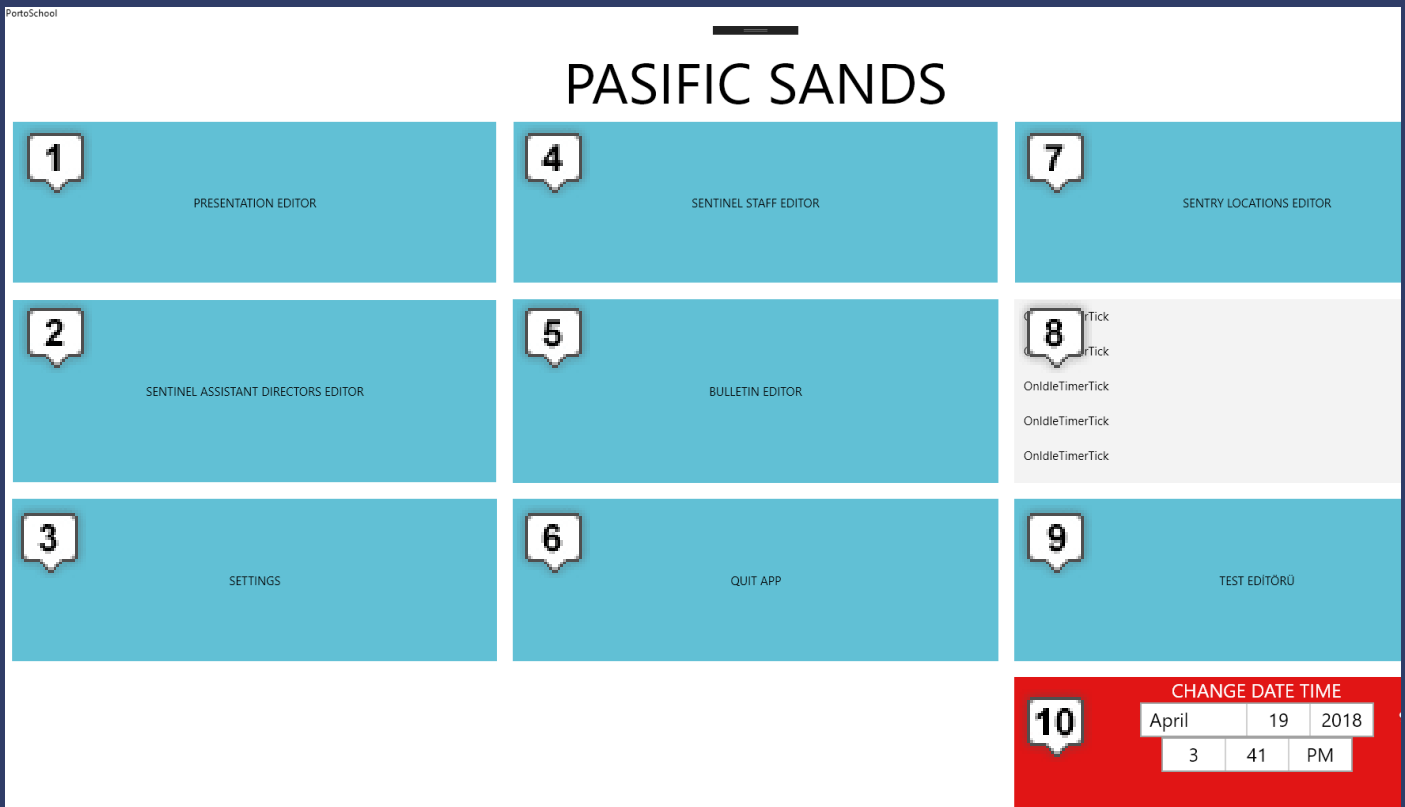

COPY COURSETABLE.XLS TO SHARED FOLDER

Set RTC Module Time : Firstly, you need to change time manually from Change Date/ Time Panel. As you press this button Real Time Module (if exists) with ds3231 chip will be set. This option is useful when MiniPC has no internet. Because of Raspberry PI3 does not have an internal clock.

Change Language : Sets User Interface Language (Currently only English and Turkish available.)

Copy CourseTable.xlsx to Shared Folder : Copies / Overrides CourseTable.xlsx thus you can modify weekly course table. Daily Course Time Plan will be displayed in Presentation Cover Page.

DASHBOARD

1. Presentation Editor :

Preview or Delete Pictures (Currently only jpg files supported by portoschool)

2. Sentinel Assistant Editor :

Settings the Sentinel Assistants Staff that is commissioned weekly period of days. So it display the day of Assistant on the Middle-Bottom Of Cover Page.

3. Settings : Details are explained the next page titled SETTINGS

4. Sentinel Staff Editor :

Settings the Sentinel Teachers or Attendants that is commisssioned weekly period of the days. So the list of multiple sentinels and their sentry locations on the Right Side of Cover Page.

5. Bulletin Editor :

Preview or Delete Bulletin Documents. (Currently only pdf files supported by portoschool)

6. Quit App :

7. Sentry Locations Editor :

8. Debug Log :

9. Test Editor :

SETTINGS - COLLEGE / FOUNDATION LOGO

SETTINGS - SENTINEL STAFF

SETTINGS - WEEKLY COURSE TABLE

COURSETABLE-en-US.xlsx file in Windows IOT data directory is for Identifying Lessons and Break Times Program Template.

WARNING !! You can modify the time and Title Labels but add or remove any row,column or modifying titles; may damage application. Even tough Labels or Time cells can be blank.
